Summary – I am a Researcher at ELLIS Alicante and ELLIS Member. I hold a PhD in Computer Science (*cum laude* and graduate of the ELLIS PhD Program), supervised by **Nuria Oliver** (ELLIS) and **Manuel Gomez Rodriguez** (MPI-SWS), and being part of the ELLIS Network (acceptance rate of <5%). My research focuses on building trustworthy AI systems for high-stakes decision-making, social networks, and recommender systems, bridging algorithmic innovation with legal and regulatory frameworks such as the EU AI Act and Spanish digital rights, leading to technical and policy-making collaborations and dissemination to wide audiences (technical, policy-making). I am also passionate about graph neural networks to understand their challenges and improve model performance and interpretability, highlighting our **ICML 2024 tutorial** on *Graph Learning: Principles, Challenges, and Open Directions*. I am also General Chair of the LoG Conference. My research has been developed in collaboration with leading researchers and institutions, including **Ameya Velingker** (Google Research), **Sepp Hochreiter** (JKU), **Lama Nachman** (Intel Labs) and other leading international collaborators.
